Professional Experience:

FULL STACK DEVELOPMENT :

Skills:

"I am an expert in Python, which is my favorite programming language. Apart from that, I have good knowledge of HTML, CSS, JavaScript, and TypeScript. I can work on both front-end and back-end development."

- "I designed a gym website with a user-friendly and high-level layout."
- "I created a game in Python with a scoring mechanism and interactive features."
- "I have learned back-end development with FastAPI and implemented multiple endpoints and response models."

Graphic Designer :

"I have 1 year of experience in graphic design, and I specialize in creating logos and other creative designs. I am a skilled designer and can create unique and captivating designs."
